

A Siemens Z6Ms True Volume TEE Transducer is shown against a white background. The device consists of a white handle with a gear-like control knob on top, and a long, black, flexible probe that is coiled into a large loop. The probe has white markings along its length, including the number '10' and '15'. The handle has a blue and white gear with letters 'P', 'L', 'M', 'A' around it.

True Volume TEE Transducer

Z6Ms on the ACUSON SC2000 Ultrasound System

Z6Ms True Volume TEE Transducer Care

Congratulations on purchasing the Z6Ms True Volume TEE transducer. This revolutionary TEE transducer on the ACUSON SC2000 ultrasound system was developed to provide clinicians with the whole story of the heart without compromise. In order to keep your Z6Ms TEE Transducer clean, safe, and ready to use:

- 1** Take the educational, web-based training “**Care and Handling of the Z6Ms True Volume TEE Transducer**” found at <https://pep.siemens-info.com/en-us/care-and-handling-of-the-z6ms-true-volume-tee-transducer>. This brief tutorial found on Siemens customer online training portal, PEPconnect, covers proper care, handling and storage as well as cleaning and disinfection procedures. Successful completion of this tutorial can help your device continue to function as expected and may prevent unexpected expenses due to accidental damage.
- 2** Since many people may handle the Z6Ms transducer, please ensure that all clinicians and staff handling this TEE transducer complete our brief educational course and receive the Certificate of Completion.
- 3** Find easy instructions to access our educational portal, PEPconnect, on the back of this flyer.

Due to warranty limitations in many countries, mishandling and improper cleaning may void your warranty coverage requiring full payment for Z6Ms replacements. Contact your local Siemens Service organization to understand warranty exclusions and limitations.

PEPconnect – Access Instructions to Customer Online Training

- 1** Go to **www.siemens.com/pepconnect** and select the appropriate option for your needs.
 - You can bookmark this page for future visits.
- 2** If you choose to Login or Register; enter your **Email** and **Password**.
 - Each person must have a unique email address.

Note: If you are new to the site, select **Register** and complete the registration form. You will receive an email confirmation with a confirmation code to complete the registration process. Enter the code provided in the email to confirm your registration and continue the login process.
- 3** Explore PEPconnect to learn about a full range of educational material.

Getting Help

If you are experiencing technical difficulties, select the **Need Help? Contact Us** link at the bottom of the screen for self-help instructions and a link to **Technical Support**.
